

APPENDIX

Appendix A: Revisions on Benefits of GREAT SupremeHealth

Appendix A.1 - [GREAT SupremeHealth P Plus / A Plus / B Plus (As-Charged Plans)]

- (a) Hospitalisation expenses will now include expenses under eligible **Mobile Inpatient Care at Home ("MIC@Home")**^[1] stays, where all criteria for a claim under MSHL are met.
- (b) **Coverage of Pregnancy and Childbirth Complications** will be enhanced to cover postpartum haemorrhage and placental insufficiency & intrauterine growth restriction. Delivery procedure for childbirth will not be covered, except for emergency caesarean section arising from one of the specified pregnancy or childbirth complications.
- (c) **Expenses for Surgery** will only cover surgical operations that are listed in Table 1 to Table 7 of the "Table of Surgical Procedures" under the MediSave or MediShield Life Scheme operated by the Ministry of Health of Singapore ("MOH"). Minor Surgical Procedures will be removed from the list of surgical operations covered.
- (d) **Expenses for Inpatient Sub-Acute Care** if provided in a restructured hospital^[2] will be enhanced to cover on an "As-charged" basis.
- (e) **Expenses for Inpatient Rehabilitative Care** if provided in a restructured hospital^[2] will be enhanced to cover on an "As-charged" basis and if provided in a Private Hospital^[3] will be enhanced to cover up to \$1,000 / \$900 / \$800 (for GSH P PLUS/ A PLUS/ B PLUS respectively) per day.
- (f) **Expenses for Inpatient Palliative Care benefit limits** will be enhanced to cover on an "As-charged" basis.
- (g) **Pre-Hospitalisation Treatment** will now cover expenses incurred up to:
 - a. 180 days before hospitalisation if the hospitalisation is in a restructured hospital (including hospitalisation under MIC@Home) or private hospital and is prescribed by a medical doctor who is a panel provider; or
 - b. 90 days before hospitalisation if the hospitalisation is in a private hospital and is prescribed by a medical doctor who is not a panel provider.
- (h) Expenses incurred for consultations, treatments and tests in connection with and prior to **outpatient kidney dialysis treatment, proton beam therapy, cell, tissue and gene therapy, radiotherapy for cancer and cancer drug treatment** will now be covered up to 90 days before such outpatient treatment if the said outpatient treatment is prescribed by a medical doctor who is not a panel provider.
- (i) **Expenses for Proton Beam Therapy ("PBT")** will now be enhanced to cover up to \$80,000 / \$60,000 / \$40,000 (for GSH P PLUS/ A PLUS/ B PLUS respectively) per period of insurance. However, such expenses will only be covered if PBT is administered for an MOH-approved indication and if the eligibility criteria for PBT under MSHL is met^[4].
- (j) **Living Donor Organ Transplant** when the Life Assured is the Organ Donor will be enhanced to cover expenses incurred by Life Assured for confinement in hospital, surgery to remove organ from the Life Assured and storage and transportation of the organ.
- (k) The increase in **Deductibles** will now be applicable for policyholders following the age of 80 years next birthday on the renewal date.
- (l) **Pro-ration factor** for A PLUS and B PLUS will be revised as follows:

Expenses incurred in / Plan Type	GSH A Plus	GSH B Plus
Private Hospital / private Community Hospital / private Inpatient Palliative Care Institution / private medical clinic	35%	25%
Restructured Hospital - Class A ward / government-funded Community Hospital - Class A ward / government-funded Inpatient Palliative Care Institution - Class A ward	N.A.	70%
Non-subsidised Short-stay Ward / day Surgery / outpatient treatment in Restructured Hospital	N.A.	70%

^[1] Refers to an inpatient care delivery model in Singapore implemented by a restructured hospital that allows clinically suitable patients to be confined and treated at their own homes, instead of in a hospital ward.

^[2] Includes government-funded community hospital.

^[3] Includes private community hospital.

^[4] The MOH-approved PBT indications and patient eligibility criteria are specified on MOH's website (<https://go.gov.sg/pbt-approved-indications>).

Appendix A.2 - [GREAT SupremeHealth Standard]

Hospitalisation expenses will now include expenses under eligible **Mobile Inpatient Care at Home ("MIC@Home")** stays, where all criteria for a claim under MSHL are met.

MIC@Home is an inpatient care delivery model in Singapore implemented by a restructured hospital that allows clinically suitable patients to be confined and treated at their own homes, instead of in a hospital ward.

Appendix A.3 - [GREAT SupremeHealth A / B (Non As-Charged Plans)]

- (a) Hospitalisation expenses will now include expenses under eligible **Mobile Inpatient Care at Home ("MIC@Home")**^[1] stays, where all criteria for a claim under MSHL are met.
- (b) **Coverage of Pregnancy and Childbirth Complications** will be enhanced to cover postpartum haemorrhage and placental insufficiency & intrauterine growth restriction. Delivery procedure for childbirth will not be covered, except for emergency caesarean section arising from one of the specified pregnancy or childbirth complications.
- (c) **Expenses for Psychiatric Treatment** will now be covered up to \$4,000 / \$3,000 (for GSH A/ GSH B respectively) per period of insurance. Coverage for pre-hospitalisation psychiatric treatment expenses will be removed.
- (d) **Daily Ward and Treatment Charges** will now cover Pre-Hospitalisation Treatment up to 180 days before hospitalisation.
- (e) **Daily Ward and Treatment Charges** will now cover Post-Hospitalisation Treatment up to 365 days from hospital discharge. Post-Hospitalisation Treatment will be enhanced to cover speech therapy, occupational therapy and physical therapy.
- (f) Expenses incurred for consultations, treatments and tests in connection with and prior to **outpatient kidney dialysis treatment, proton beam therapy, cell, tissue and gene therapy, radiotherapy for cancer and cancer drug treatment** will now be covered up to 120 days before such outpatient treatment.
- (g) **Expenses for Proton Beam Therapy ("PBT")** will now be enhanced to cover up to \$40,000/ \$20,000 (for GSH A/ GSH B respectively) per period of insurance. However, such expenses will only be covered if PBT is administered for the Ministry of Health of Singapore ("MOH")-approved indication and if the eligibility criteria for PBT under MSHL is met^[2].
- (h) The increase in **Deductibles** will now be applicable for policyholders following the age of 80 years next birthday on the renewal date.
- (i) **Pro-ration factors** of GSH B will be revised as follows:

Expenses incurred in / Plan Type	B
Private Hospital / private Community Hospital / private Inpatient Palliative Care Institution / private medical clinic	25%
Restructured Hospital - Class A ward / government-funded Community Hospital - Class A ward / government-funded Inpatient Palliative Care Institution - Class A ward	70%
Non-subsidised Short-stay Ward / day Surgery / outpatient treatment in Restructured Hospital	70%

^[1] Refers to an inpatient care delivery model in Singapore implemented by a restructured hospital that allows clinically suitable patients to be confined and treated at their own homes, instead of in a hospital ward.

^[2] The MOH-approved PBT indications and patient eligibility criteria are specified on MOH's website (<https://go.gov.sg/pbt-approved-indications>).
