Underlying Fund Objective

The underlying fund of this product aims to achieve stable income at low levels of volatility by investing solely in fixed income securities.

Investment Strategy & Approach

The underlying fund of this product invests in fixed income securities with minimal cash and cash equivalents, and is passively managed with top-down approach and bottom-up approach. Top-down approach by adopting a disciplined macroeconomic framework to identify major turning points in global financial markets to determine long-term assets allocation decisions. Bottom-up approach in bond selection process which relies on various factors including financial position, valuation, company or industry risks and prospects.

Asset Allocation

The underlying fund invests 100% in Malaysian fixed income securities with minimal cash and cash equivalents.

This crediting rate information sheet should be read in conjunction with the product brochure, Product Disclosure Sheet, sales illustration, fund fact sheet and policy contract. Potential policyholders should be aware that the underlying fund may be exposed to various risks including but not limited to credit risk, interest rate and inflation risk.
