Japan (-0.4%). Market participation eased as average daily trading value slipped to US$787.1 million from US$ 815.1 million the prior month, a -3.4% drop MoM. Key indexes in the U.S. were mixed in September, where the Dow Jones was down 4.3% MoM, the S&P 500 slipped 0.5% MoM, and the Nasdaq gained 1.9% MoM. This was supported by continued strength in mega-cap tech and AI-related stocks. However, rising Treasury yields and oil prices also revived inflation and Fed-tightening concerns, particularly impacting cyclical and rate-sensitive stocks. Hence, there was a widening performance gap between tech and the broader market.
