Protect your family's financial future

High protection for death and Total and Permanent Disability (TPD)

With coverage starting from RM500,000, Smart Revive Max helps ensure that those most important to you will not be financially burdened should life take an unpleasant turn.

In the unexpected event of death, your loved ones will receive your basic sum assured plus additional sum assured (if any), or the total investment value, whichever is higher. Should you experience TPD prior to the policy anniversary of attained age 75 years next birthday, they will instead receive your basic sum assured plus additional sum assured (if any), less the total investment value.

Note: Terms and conditions apply.

Extra safety net of additional 5% sum assured every 10 years

Smart Revive Max always has your best interests at heart, ensuring you and your entire legacy are better protected with an extra financial safety net. Your coverage will increase by 5% of your basic sum assured every 10 policy years, up to a maximum of 30% of the basic sum assured.

Note: Terms and conditions apply.

Greater confidence with protection that bounces back even after partial withdrawal

We understand the need for the flexibility of a partial withdrawal to bolster your immediate finances. Smart Revive Max comes with the Cover Revive feature in which your basic sum assured will bounce back to its original amount before partial withdrawal, on the monthly due date of insurance charge on or after 24 months from the partial withdrawal date, provided no claim has been admitted on the life assured and subject to a maximum aggregate amount of RM250,000 per life.

With this, you can access your funds when needed without compromising your long-term protection, giving you peace of mind that your legacy remains fully safeguarded.

Note: Terms and conditions apply.

Plan ahead for how your loved ones receive policy proceeds, tailored to their needs

To ensure you have full control over how your wealth is distributed, you can also opt to attach the Legacy Distribution Rider and choose how the proceeds from your policy will be paid out to your loved ones upon your passing. Choose a lump sum payout, structured installments, milestone-based payout, or a combination of these options to create a legacy plan that reflects your wishes while supporting your family's evolving needs.

Note: Terms and conditions apply.

56 – 65 years	Age 75 years next birthday, and every subsequent 10 years

More than or equal to 35 policy years	5.0%

Note: Booster rewards are only payable provided the policy is in force, partial withdrawals made have not exceeded 5 times, and all premiums due are paid up to date. Terms and conditions apply.

What's more: At maturity, you'll receive 100% of your total investment value plus a maturity booster to boost up your savings. Flexible premium payment terms and coverage term options

Smart Revive Max is a limited pay investment-linked life insurance plan that fulfills your goals of wealth accumulation, legacy creation, and business continuity needs all in one — so that you can better keep your loved ones financially secure.

This plan offers flexibility for you to tailor your protection with various premium payment term options of 5, 10 or 20 years and coverage term options of up to either age 70, 80, or 90 years next birthday, allowing you to manage both your finances and life goals ahead of time.

Based on your chosen premium payment term, your insurance premiums paid are allocated to unit funds at the following rates:

Policy Year	Insurance Premium Allocation Rate (%)		
	Premium Payment Term		
	5 Years	10 Years	20 Years
1	86	80	60
2	86	80	60
3	86	80	60
4	96	90	80
5	96	90	80
6	-	90	80
7	-	95	95
8	-	95	95
9 and above	-	100	100

Note: Based on your chosen protection and investment levels, your premium may be segregated into Insurance Premium and Balancer (regular premiums in excess of the Insurance Premium). For policies with a Basic Annual Premium exceeding the maximum amount of Insurance Premium allowed under regulatory requirements based on the chosen coverage, the amount in excess will be treated as the Balancer. The Balancer portion is then allocated at a 95% allocation rate to unit funds throughout your chosen premium payment term.

Note: Terms and conditions apply.

Overview of the benefits

An example of the Smart Revive Max journey

Here's how Smart Revive Max may help provide financial protection through different stages of life:

Jason, age 30
Businessman and father of 2

Without Smart Revive Max	With Smart Revive Max
Jason opts to remain uninsured, choosing to spend his money on his business and family.	Jason purchases Smart Revive Max with a basic sum assured of RM1,000,000 which covers him up to age 90 years next birthday.
Without adequate protection, Jason's family risks a dim financial future if he passes unexpectedly or is afflicted with TPD.	He enjoys the security of insurance protection for **death and TPD**, together with additional financial support for **ICU admission**.
Jason takes out a business loan to expand his business, significantly reducing his future savings to repay his loans.	Jason performs a partial withdrawal of RM100,000 to grow his business. 24 months later, his basic sum assured will **bounce back**[1] to the full protection amount of RM1,000,000!
With no secure way to passively grow his wealth, Jason's finances rely purely on unpredictable business performance.	Jason passively grows his wealth through unit funds and enjoys strengthened protection with an **additional 5% basic sum assured every 10 policy years**.

He is **admitted to the ICU** for 5 consecutive days, and has to step away from work to focus on his treatment and recovery.

With no financial protection in place, Jason's hospital bills greatly strain his hard-earned savings.	Jason's policy supports him with **admission event benefit** of 5% of his basic sum assured for 5 days ICU stay, amounting to RM50,000 to **help with his medical costs**.
Despite his advanced age, he has no choice but to return to work to make up for his lost finances.	Jason enjoys his golden years with **booster rewards** of RM50,000 payable at age 65, 75, and 85 respectively.

Jason eventually retires, and **passes away at age 85**.

Jason was ultimately not able to achieve the legacy he dreamed of passing onto his children.	Jason leaves behind a legacy to remember for his family, who receive his **death benefit**[2] which includes the **double maturity booster**[3] upon his passing.

Total guaranteed payout from Smart Revive Max

RM1,550,000

Admission Event Benefit: RM50,000
Booster reward: RM150,000
Benefit received upon death: RM1,350,000

Notes:

[1] *Under Cover Revive feature, the basic sum assured will bounce back to the amount before the partial withdrawal, on the monthly due date on or after 24 months from the partial withdrawal date.*

[2] *The death benefit is the higher of the basic sum assured + additional sum assured, or total investment value.*

[3] *The double maturity booster will be paid provided all premiums due are paid up-to-date and no more than 5 partial withdrawals have been made.*

Important notices

Smart Revive Max is a limited pay investment-linked insurance plan. Some of the choices of funds invest in Shariah-approved securities. However, this is not a Shariah-compliant product. **This plan is an insurance product that is tied to the performance of the underlying assets, and is not a pure investment product such as unit trusts.** Premiums are payable until the end of the premium payment term, or until death or termination of the policy, whichever comes first.

You should satisfy yourself that this plan will best serve your needs and that the premium payable under the policy is an amount you can afford. A free-look period of 15 days is given for you to review the suitability of the plan. If the policy is returned to the Company during this period, the Company shall refund an amount equal to the sum of:

a. the total investment values of the policy based on the net asset value at the next valuation date; and
b. the investment values of the units which have been cancelled to pay for insurance charges and policy fees; and
c. the amount of premiums that have not been allocated;

minus the expenses incurred for medical examinations, if any.

Net asset value is the single price at which the policy owner buys the units in a unit fund and sells the units back to the unit fund. If you switch over your policy from one company to another or if you exchange your current policy with another policy within the same company, you may be required to submit an application where the acceptance of your proposal will be subject to the terms and conditions to be imposed at the time of the policy switching or replacement.

In cases where the purchase involves a premium of a sizeable amount (i.e. RM5,000 and more), you should consider purchasing a single premium investment-linked insurance plan as single premium plans offer better allocation rates for investment. However, please take note that single premium plans may not offer as much insurance protection as regular premium plans and may have less riders/supplementary benefits available.

You may stop paying the premiums and still enjoy protection as long as there is a sufficient total investment value to pay for the insurance charges, policy fee and supplementary benefit premiums, where applicable. However, there is a possibility of the policy lapsing when the required charges, including rider charges, exceed the value of the fund units available. Purchasing too many unit-deduction riders may deplete the fund units.

In the event the actual sustainability of the policy is reduced due to revisions to insurance charges, the Company may vary the Basic Annual Premium and any regular investment top-ups on the policy anniversary by giving you 3 months' advance written notice.

Buying an investment-linked insurance plan is a long-term commitment. An early termination of the policy involves high costs and the withdrawal value is dependent on prevailing market value of the underlying assets of the unit fund. Therefore, the withdrawal value may be less than the total premiums paid. The policy value may rise or fall, based on the underlying performance of the funds. The performance of the funds is not guaranteed. The sustainability of the policy depends on the underlying performance of the funds. The investment risk under the policy will be borne solely by the policy owner. Past actual performance is not a guide to future performance, which may be different.

Any amount of the premium that has not been allocated to purchase units is used to meet the payment of commissions to intermediaries and general expenses of the Company. The Company reserves the right, in circumstances it considers exceptional, to suspend issuance or redemption of units.

The exclusions and limitations of benefits highlighted above are not exhaustive.
