The JCI closed the month of Nov23 at 4.9%, roughly in line with emerging market peers but lagging behind the developed markets which saw a steeper selloff over the past couple months. The IDX30 and LQ45 continued to lag the broader index at 4.59% and 4.22% respectively as BREN, BYAN, and CUAN continued to support the JCI. The swift reversal in global rate expectations along with the numbing of investor concerns on geopolitics resulted in the IDR strengthening to close the month at 15,510 after approaching 16,000 the month prior.

The falling global yields also resulted in a decline in the 10y Indonesian government bond yield to 6.6% at the end of the month from 7.1% the month prior. Improved global sentiment from rate expectations combined with solid domestic sentiment as the IDR retreated from the perceived danger of breaking 16,000 has resulted in an inflow of USD 26.5mn into equities, compared to an outflow of UDS 496mn the month prior. The foreign position in government bonds showed an increase of IDR 23.5in to IDR 834tn, reversing three consecutive months of decline. Bl supported the IDR by depleting its FX reserves over the past few months and an unexpected policy rate hike in mid Oct23.

## Investment Manager Profile
