

**Great Eastern Life Assurance (Malaysia) Berhad**  
**Crediting Rates for Max Step-Up**  
**As at 30 June 2023**

**Historical Crediting Rates**

Notice: The above shows the historical net crediting rates per annum of this product. Net crediting rates are declared on a monthly basis based on the net crediting rate per annum for the respective month, depending on the performance of the underlying fund of this product after deducting investment tax, fund management charge and supplementary charge. Past performance of the underlying fund is not an indication of its future performance.

**Net Crediting Rates (by month)**

Policy Years	Month	2022						2023

**Underlying Fund Objective**

The underlying fund of this product aims to achieve medium to long-term capital appreciation by investing in a mixture of equities and fixed income securities with good fundamentals and growth potential.

**Investment Strategy & Approach**

The underlying fund invests in a mixture of equities and fixed income securities with good fundamentals and growth potential, and is actively managed with top-down approach and bottom-up approach. Top-down approach by adopting a disciplined macroeconomic framework to identify major turning points in global financial markets to determine long-term assets allocation decisions. Bottom-up approach in stock/bond selection process which relies on various factors including financial position, valuation, company or industry risks and prospects.

**Asset Allocation**

The underlying fund invests a maximum of 85% in fixed income securities, and a maximum of 30% in Malaysian equities and foreign equities (up to 10%). The balance will be invested in liquid assets which include money market instruments and cash or cash equivalents.

This crediting rate information sheet should be read in conjunction with the product brochure, Product Disclosure Sheet, sales illustration, fund fact sheet and policy contract. Potential policyholders should be aware that the underlying fund may be exposed to various risks including but not limited to market risk, liquidity risk, credit risk, inflation risk and currency risk.
