Long-term savings that are sustainable across generations

While GREAT Multi-Gen Wealth 2 may begin with you, it does not need to end with you. The plan's unique feature gives you the option of appointing Alternate Policyowner (APO)⁽¹⁾ and Secondary Life Assured (SLA)⁽²⁾ as well as Change of Life Assured (CLA)⁽³⁾.

In the event the unfortunate happens to you, your appointed Alternate Policyowner will become the new policy owner to take over your policy.

If you have appointed Secondary Life Assured, upon the existing life assured passes away, the existing policy will continue by covering the Secondary Life Assured for the remaining coverage term without affecting the policy values.

Should your family expand and you wish to protect them, there is also the Change of Life Assured option, whereby you can replace the existing life assured by appointing a loved one as the new life assured at any time and they will be covered under GREAT Multi-Gen Wealth 2 from then on. The existing policy will continue for the remaining coverage term without affecting the policy values.

With GREAT Multi-Gen Wealth 2, plan ahead and sustain your savings across generations, providing your loved ones with a lasting legacy for the future, with up to RM1 million annual premium.

Important notices

GREAT Multi-Gen Wealth 2 is a whole life plan with limited premium payment term without participation in profits. The investment booster will be credited into the total investment value by purchasing units in the chosen unit fund(s) while the survival benefit will be paid to you. Some of the choices of funds invest in Shariah-approved securities. However, this is not a Shariah-compliant product. **The total investment value is tied to the performance of the underlying assets, and is not a pure investment product such as unit trusts.** Premiums are payable until the end of the premium payment term, or until death or termination of the policy, whichever occurs first. Premium will remain the same throughout the premium payment term.

You should satisfy yourself that this plan will best serve your needs and that the premium payable under the policy is an amount you can afford. A free-look period of 15 days is given for you to review the suitability of the plan. If the policy is returned to the Company during this period, the Company shall refund an amount equal to the sum of:

- a. the basic premium paid without interest plus rider(s) premium (minus the expenses incurred for medical examinations, if any); and
- b. the unallocated premiums (if any) and the value of the units that have been allocated (if any) at unit price at the next valuation date.

Net asset value is the single price at which the policy owner buys the units in a unit fund and sells the units back to the unit fund. If you switch over your policy from one insurance company to another or if you exchange your current policy with another policy within the same insurance company, you may be required to submit an application where the acceptance of your proposal will be subject to the terms and conditions to be imposed at the time of the policy switching or replacement.

The policy does not have a guaranteed minimum cash value on termination until after you have paid premiums for two years. An early termination of the policy involves high costs and the withdrawal value of the total investment value is dependent on the prevailing market value of the underlying assets of the unit fund(s). Therefore, **if you surrender your policy early, you may get back less than the amount you have paid.** The total investment value may rise or fall, based on the underlying performance of the fund(s). **The performance of the fund is not guaranteed.** The investment risk will be borne solely by the policy owner. Past actual performance is not a guide to future performance, which may be different.

If you stop paying premiums before the end of the premium payment term, an automatic premium loan will be effected under your policy to pay future premiums so long as the cash value and/or total investment value are more than the total indebtedness. The Company shall charge interest on the above loans at interest rates to be determined by the Company from time to time. The prevailing interest rate is available on the Company's official website. Cessation of premium payment before the end of the premium payment term may lead to an early termination of coverage.

You have the option of boosting the investment value of your policy via single premium top-ups, subject to a minimum of RM1,000 per top up, provided all premiums due and any indebtedness have been paid.

95% of the Single premium top ups will be utilised to purchase units of investment. The remaining 5% of the single premium top-ups that has not been allocated to purchase units is used to meet the payment of commissions to intermediaries and general expenses of the Company. The Company reserves the right, in circumstances it considers exceptional, to suspend issuance or redemption of units.
