## PERNYATAAN DEWAN DIREKSI [D.1]

## BOARD STATEMENT [D.1]

Di Great Eastern Life Indonesia, keberlanjutan merupakan inisiatif yang kami jalankan secara konsisten dari tahun ke tahun. Bagi kami, keberlanjutan adalah bagian dari tanggung jawab dalam membangun masa depan yang lebih hebat dan bermakna, sejalan dengan semangat Jadi Hebat, Reach for Great. Komitmen ini diwujudkan melalui landasan kerangka keberlanjutan yang berpijak pada nilai-nilai utama perusahaan, yaitu Integritas, Inisiatif, dan Ikut Serta (3I).

Sepanjang tahun 2024, kami telah mengambil berbagai langkah nyata untuk memperkuat integrasi prinsip keberlanjutan ke dalam seluruh aspek operasional. Kami memperkuat tata kelola internal melalui implementasi Rencana Aksi Keuangan Berkelanjutan (RAKB), serta penyesuaian terhadap regulasi terkini seperti PSAK 74. Sistem pengendalian risiko dan manajemen data juga terus kami perkuat, dan seluruh karyawan diwajibkan mengikuti pelatihan e-learning yang mencakup topik AML/CFT, manajemen risiko, fair dealing, dan perlindungan konsumen. Semua ini menjadi dasar penting dalam menjaga kepercayaan dan akuntabilitas.

Kami juga terus mendorong inovasi dalam menghadirkan solusi keuangan yang berkelanjutan. Salah satu tonggak penting adalah peluncuran GreatLink SustAbility Equity Fund, sub-dana unit-link berbasis ESG pertama di Indonesia yang dikelola dengan dukungan Artificial Intelligence dan berinvestasi pada saham-saham dalam indeks IDX ESG Leaders. Langkah ini mencerminkan upaya kami dalam menghadirkan produk yang bertanggung jawab sekaligus relevan dengan kebutuhan masa depan.

Di sisi lain, partisipasi aktif seluruh elemen organisasi juga menjadi penggerak penting dalam perjalanan keberlanjutan kami. Melalui program The GREAT Comfund dan Great Ambassador, karyawan dari berbagai divisi berpartisipasi langsung dalam berbagai kegiatan sosial dan lingkungan seperti penanaman mangrove dan pengelolaan sampah. Kami juga menjalin kolaborasi strategis dengan mitra seperti OCBC melalui OCBC Society dan Rekosistem dalam pengelolaan limbah anorganik—menunjukkan pendekatan keberlanjutan yang melibatkan seluruh pemangku kepentingan.

Kami juga terus membangun kesiapan organisasi dalam menghadapi tantangan masa depan melalui pelatihan kepemimpinan, media training, penguatan literasi keberlanjutan, serta adopsi teknologi digital dan automasi.

*At Great Eastern Life Indonesia, sustainability is a commitment we have consistently upheld over the years. We see it as a shared responsibility to build a greater and more meaningful future, aligned with our brand spirit: Jadi Hebat, Reach for Great. This commitment is reflected in our sustainability framework, which is anchored by our core values of Integrity, Initiative, and Involvement (3I).*

*Throughout 2024, we undertook a range of concrete measures to further integrate sustainability into all aspects of our operations. We strengthened internal governance through the implementation of the Sustainable Finance Action Plan (Rencana Aksi Keuangan Berkelanjutan / RAKB), as well as alignment with the latest regulatory standards, including PSAK 74. We also enhanced risk management and data governance systems, and required all employees to complete e-learning programmes on AML/CFT, risk management, fair dealing, and consumer protection. These efforts form the foundation of our accountability and trust-based culture.*

*We continued to foster innovation in delivering sustainable financial solutions. A key milestone was the launch of the GreatLink SustAbility Equity Fund – Indonesia's first ESG-based unit-linked sub-fund, powered by Artificial Intelligence and investing in stocks listed under the IDX ESG Leaders Index. This initiative underscores our commitment to providing responsible investment options that are relevant to the needs of the future.*

*Active participation across the organisation has also played a vital role in our sustainability journey. Through initiatives such as The GREAT Comfund and Great Ambassador programme, employees from various departments were directly involved in social and environmental initiatives, including mangrove planting and waste management. We also forged strategic partnerships with external stakeholders such as OCBC through OCBC Society and Rekosistem in supporting inorganic waste processing – demonstrating our collaborative approach to long-term impact.*

*To prepare the organisation for future challenges, we continued to strengthen internal capabilities through leadership development, media training, sustainability literacy, and the adoption of digital technology and automation. These*

### Sustainability Strategy [A.1]

*Building on the three core pillars and aligned with its parent entity's sustainability framework, Great Eastern Life Indonesia has established a sustainability strategy that focuses on maintaining a balance between economic growth, environmental protection, and social wellbeing.*

*This strategy is implemented through a range of programmes covering climate action, responsible financing and sustainable financial solutions, community development, cyber security and data protection, fair dealing, financial crime prevention, and transparent and ethical internal governance.*

*The Company regularly conducts materiality assessments to ensure that sustainability is not merely a concept. These assessments aim to identify and evaluate the most relevant sustainability issues for the Company and its stakeholders. Through this process, the Company can recognise various risks and opportunities related to environmental, social, and governance (ESG) aspects. The results are then used to adjust the sustainability strategy to remain responsive to global developments such as climate change, regulatory changes, and socio-economic shifts.*

At the business unit level, line managers and staff also share responsibility for implementing sustainability principles in day-to-day operations.

Tantangan ini sekaligus membuka peluang bagi Perusahaan untuk memperkuat tata kelola keberlanjutan dan mendorong inovasi dalam menciptakan nilai bersama (shared value).

As a mitigation measure, the Company assesses the potential value of losses resulting from business interruption to estimate the recoverable income during the disruption period. This assessment forms part of the Company's business resilience strategy and supports efforts to build more robust operations facing environmental and climate-related risks.

Dari sisi produk, perusahaan telah meluncurkan sejumlah produk baru, sebagai upaya untuk menjawab kebutuhan perlindungan yang terus berkembang. Sementara dari sisi layanan, salah satu inovasi unggulan adalah Customer Portal GoGREAT! Services, yang senantiasa disempurnakan sejak 2021. Portal ini memudahkan nasabah dalam mengakses informasi polis, laporan investasi, manfaat asuransi, serta melakukan transaksi seperti pengajuan klaim, pembaruan data pribadi, dan perubahan metode pembayaran. Dengan sistem login yang praktis menggunakan ID pelanggan dan OTP tanpa memerlukan dokumen fisik, GoGREAT! Services menawarkan pengalaman digital yang cepat, akurat, dan tanpa hambatan.

Dalam memperkuat layanan digital, perusahaan juga mengadopsi teknologi mutakhir seperti Artificial Intelligence (AI) dan Machine Learning. Teknologi ini memungkinkan analisis kebutuhan nasabah secara lebih akurat, penyediaan layanan yang lebih personal, serta otomatisasi berbagai proses guna meningkatkan efisiensi dan meminimalkan kesalahan manual. Dukungan infrastruktur berbasis Application Programming Interface (API) juga memperluas jangkauan dan fleksibilitas ekosistem layanan digital perusahaan.

Seluruh langkah strategis ini diperkuat melalui pendekatan Customer Journey Mapping, yang digunakan untuk mengevaluasi dan menyempurnakan setiap titik interaksi dengan nasabah. Beberapa perbaikan yang telah dilakukan antara lain penyederhanaan dokumen klaim, optimalisasi proses onboarding, serta penerapan WhatsApp Enterprise (GEMA) sebagai kanal layanan mandiri. Inisiatif-inisiatif ini tidak hanya meningkatkan pengalaman pelanggan, tetapi juga mendukung efisiensi operasional secara berkelanjutan.

## Produk dan Jasa Keuangan yang Telah Dievaluasi Keamanannya [F.27]

Sejalan dengan transformasi digital yang diterapkan di seluruh aspek operasional, termasuk dalam layanan kepada nasabah, Great Eastern Life Indonesia menempatkan keamanan dan kerahasiaan informasi sebagai prioritas utama. Kami menyadari bahwa ancaman siber berpotensi memberikan dampak signifikan terhadap kualitas layanan dan kinerja perusahaan secara keseluruhan. Oleh karena itu, perusahaan terus memperkuat prosedur keamanan teknologi informasi yang mencakup pencegahan pencucian uang, mitigasi kejahatan keuangan, mekanisme whistleblowing, serta perlindungan data nasabah.

Dalam mendukung digitalisasi layanan, kami juga membangun infrastruktur yang mendukung proses penjualan

## Dampak Produk dan Jasa [F.28]

Sebagai penyedia layanan asuransi jiwa dan umum, Great Eastern Life Indonesia memahami bahwa setiap produk dan jasa keuangan berkelanjutan yang ditawarkan dapat menimbulkan dampak, baik positif maupun negatif, terhadap nasabah dan pemangku kepentingan lainnya. Oleh karena itu, perusahaan secara berkala melakukan penilaian terhadap seluruh produk yang didistribusikan untuk memastikan kesesuaian dengan prinsip keberlanjutan dan perlindungan konsumen.

Dari sisi dampak positif, produk-produk asuransi yang kami tawarkan memberikan perlindungan finansial jangka panjang bagi individu, keluarga, dan pelaku usaha, serta berkontribusi terhadap ketahanan sosial-ekonomi masyarakat. Kami juga memiliki produk yang dirancang untuk mendukung tujuan keberlanjutan, dengan menanamkan dana pada instrumen berbasis ESG.

Namun demikian, kami juga menyadari adanya potensi dampak negatif, seperti risiko kesalahan penjualan, ketidaksesuaian kebutuhan produk dengan profil risiko nasabah, serta risiko keterbatasan pemahaman nasabah terhadap manfaat, batasan, dan syarat dalam polis.

Untuk memitigasi hal tersebut, perusahaan telah menerapkan sejumlah langkah. Kami menyediakan informasi produk yang transparan dan mudah dipahami, pelatihan intensif bagi tenaga pemasar, penerapan proses analisis kebutuhan serta kesesuaian calon nasabah, serta mekanisme pengaduan nasabah yang responsif. Selain itu, Perusahaan juga memastikan bahwa semua saluran penjualan produk baik secara digital maupun tatap muka, telah mematuhi standar kepatuhan dan tata kelola yang ditetapkan.

## Product and Service Impact [F.28]

*As a provider of life and general insurance services, Great Eastern Life Indonesia recognises that every sustainable financial product and service we offer can generate both positive and negative impacts for customers and other stakeholders. Therefore, the company regularly assesses all distributed products to ensure alignment with sustainability principles and consumer protection.*

*On the positive side, our insurance products offer long-term financial protection for individuals, families, and businesses, and contribute to the socio-economic resilience of communities. We also offer products specifically designed to support sustainability goals by investing funds in ESG-based instruments.*

*Nonetheless, we are aware of potential adverse impacts, such as the risk of mis-selling, mismatches between product features and the customer's risk profile, and limitations in customer understanding of the benefits, exclusions, and conditions within a policy.*

*To mitigate these risks, the company has implemented several measures. We provide clear and accessible product information, intensive training for our sales personnel, a robust needs analysis and suitability assessment process for prospective customers, and responsive complaint-handling mechanisms. Furthermore, we ensure that all sales channels—whether digital or face-to-face—comply with the company's governance and compliance standards.*
