Protection with investment allocation that increases over time

SmartProtect Junior is a regular premium investment-linked insurance plan that gives you access to professionally managed unit funds. It allows your child to enjoy long-term coverage up to age 100 years next birthday.

The insurance premiums paid are allocated to the unit funds at rates that increase over time as follows:

Policy Year	Insurance Premium Allocation Rate
1-3	60%
4-6	80%
7-8	95%
9 and above	100%

Note: Terms and conditions apply.

Protection against death or TPD

SmartProtect Junior provides you and your child with essential coverage against life's uncertainties. If the unexpected happens to your child, the basic sum assured, additional sum assured and total investment value will be paid out.

Should TPD occur prior to the policy anniversary on which your child attains age 70 next birthday, the basic sum assured, additional sum assured and total investment value will be paid out in accordance with the provisions of the policy.

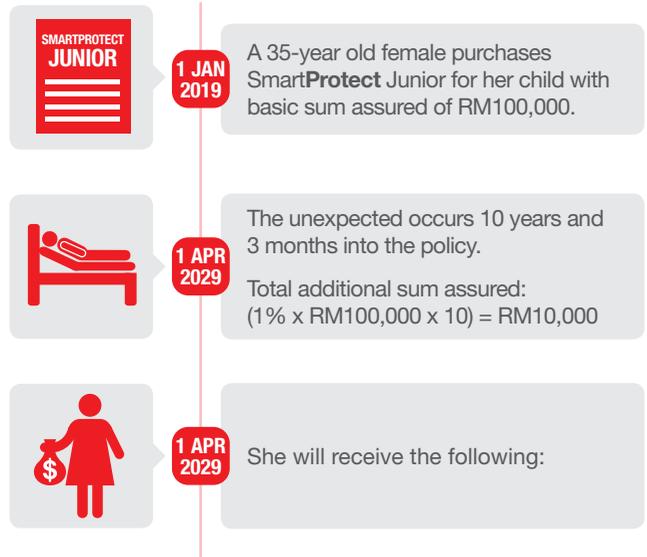

Note: If this plan commences before the birth of your child, the abovementioned coverage will only start from the next monthly due date following your child's birth. Other terms and conditions apply.

Additional 1% on sum assured each year

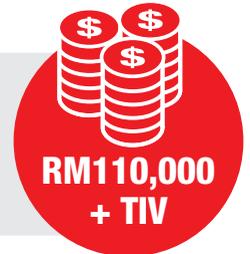

With SmartProtect Junior, an additional sum assured of 1% of the basic sum assured is provided to you upon every completed policy year, should death or TPD occur, up to the end of the 30th policy year.

An example of how this works:

Total payout upon death:

Basic sum assured + additional sum assured + total investment value =
RM110,000 + total investment value

Note: The example above is used for illustrative purposes only. Terms and conditions apply.

Maturity benefit

Once the policy matures, you will receive 100% of your total investment value.

Note: Terms and conditions apply.

No-Lapse Guarantee as a safety net

SmartProtect Junior comes with a 'No-Lapse Guarantee' for the first three policy years starting from the day the policy is in force. This valuable feature ensures that your policy will continue to remain in force even if your total investment value becomes zero, so long as the premiums are paid consistently on each premium due date or during the grace period and no withdrawal is made within the first three policy years.

Note: Terms and conditions apply.

Financial flexibility for a secure tomorrow

SmartProtect Junior lets you tailor the protection and investment levels to suit your own needs and goals. To safeguard your child's financial security in the future, you can even bolster the resources you leave him, with the option of boosting the investment value of your policy via single premium top-ups subject to a minimum of RM1,000 per top-up.

Note: Terms and conditions apply.

Optional education savings for your child

SmartProtect Junior also opens doors to better education opportunities for your child with IL EduSaver, an optional regular-premium investment top-up attachable to this plan to assist you in building education savings for your child's future.

Premiums paid for IL EduSaver will be allocated into an Education Fund Account, which will be payable to you in one lump sum according to the table below:

	Amount of total account value in Education Fund Account payable
On the policy anniversary on which your child attains age 18 years next birthday	50%
Upon maturity	100%

Note: Terms and conditions apply.

Important Notices

Smart**Protect** Junior is a regular premium investment-linked insurance plan. Some of the choices of funds invest in Shariah-approved securities. However, this is not a Shariah-compliant product. **This plan is an insurance product that is tied to the performance of the underlying assets, and is not a pure investment product such as unit trusts.** Premiums are payable for the whole term of the policy, or until death or TPD or termination of the policy, whichever comes first.

You should satisfy yourself that this plan will best serve your needs and that the premium payable under the policy is an amount you can afford. A free-look period of 15 days is given for you to review the suitability of the plan. If the policy is returned to the Company during this period, the Company shall refund an amount equal to the sum of:

- a) the total investment values of the policy based on the net asset value at next valuation date; and
- b) the investment values of the units which have been cancelled to pay for insurance charges and policy fee; and
- c) the amount of the premiums that have not been allocated; minus the medical expenses incurred for medical examinations, if any.

Net asset value is the single price at which the policy owner buys the units in a unit fund and sells the units back to the unit fund. If you switch over your policy from one company to another or if you exchange your current policy with another policy within the same company, you may be required to submit an application where the acceptance of your proposal will be subject to the terms and conditions to be imposed at the time of the policy switching or replacement.

In cases where the purchase involves a premium of a sizeable amount i.e. RM5,000 and more, you should consider purchasing a single premium investment-linked insurance plan as single premium plans offer better allocation rates for investment. However, please take note that single premium plans may not offer as much insurance protection as regular premium plans and may have less riders/supplementary benefits available.

You may stop paying the premiums and still enjoy protection as long as there is a sufficient total investment value to pay for the insurance charges, policy fee and supplementary benefit premiums, where applicable. However, there is a possibility of the

policy lapsing when the required charges, including rider charges, exceed the value of the fund units available. Purchasing too many unit-deduction riders may deplete the fund units.

In the event the actual sustainability of the policy is reduced due to revision of insurance charges, the Company may vary the Basic Annual Premium and any regular investment top-ups on policy anniversary by giving you 3 months' advance written notice.

Buying an investment-linked insurance plan is a long-term commitment. An early termination of the policy involves high costs and the withdrawal value is dependent on the prevailing market value of the underlying assets of the unit fund. Therefore, the withdrawal value may be less than the total premiums paid. The policy value may rise or fall, based on the underlying performance of the funds. The performance of the funds is not guaranteed. The sustainability of the policy depends on the underlying performance of the funds. The investment risk under the policy will be borne solely by the policy owner. Past actual performance is not a guide to future performance, which may be different.

Any amount of the premium that has not been allocated to purchase units is used to meet the payment of commissions to intermediaries and general expenses of the Company. The Company reserves the right, in circumstances it considers exceptional, to suspend issuance or redemption of units.
