Long-term protection with flexible premium payment terms

SmartProtect Sure is a regular premium investment-linked insurance plan that protects you for 30 years or up to age 70 years next birthday, whichever is later. It also comes with the flexibility of selecting your preferred payment term of 5, 10, 20 or 30 years to suit your financial commitments.

Based on your chosen premium payment term, your insurance premiums paid are allocated to unit funds at the following rates:

Policy Year	Insurance Premium Allocation Rate (%)		
	Premium Payment Term		
	5 Years	10 Years	20 Years & 30 Years
1	86	80	60
2	86	80	60
3	86	80	60
4	96	90	80
5	96	90	80
6	N/A	90	80
7	N/A	95	95
8	N/A	95	95
9 & above	N/A	100	100

Based on your chosen protection and investment level, your premium may be segregated into Insurance Premium and Balancer (regular premium in excess of the Insurance Premium). For policies with a Basic Annual Premium exceeding the maximum amount of Insurance Premium allowed under regulatory requirement based on the chosen coverage, the amount in excess will be treated as Balancer. The Balancer portion is then allocated at a 95% allocation rate to unit funds throughout your chosen premium payment term.

Important Notices

SmartProtect Sure is a regular premium investment-linked insurance plan. Some of the choice of funds invests in Shariah-approved securities. However, this is not a Shariah-compliant product. **This plan is an insurance product that is tied to the performance of the underlying assets, and is not a pure investment product such as unit trusts.** Premiums are payable until the end of the premium payment term, or until death or TPD or termination of the policy, whichever comes first.

You should satisfy yourself that this plan will best serve your needs and that the premium payable under the policy is an amount you can afford. A free-look period of 15 days is given for you to review the suitability of the plan.

If the policy is returned to the Company during this period, the Company shall refund an amount equal to the sum of:

- a) the total investment values of the policy based on the net asset value at the next valuation date; and
- b) the investment values of the units which have been cancelled to pay for insurance charges and policy fees; and
- c) the amount of premiums that have not been allocated; minus the expenses incurred for medical examinations, if any.

Net asset value is the single price at which the policy owner buys the units in a unit fund and sells the units back to the unit fund. If you switch over your policy from one company to another or if you exchange your current policy with another policy within the same company, you may be required to submit an application where the acceptance of your proposal will be subject to the terms and conditions to be imposed at the time of the policy switching or replacement.

In cases where the purchase involves a premium of a sizeable amount (i.e. RM5,000 and more), the prospect should consider purchasing a single premium investment-linked insurance plan as single premium plans offer better allocation rates for investment. However, please take note that single premium plans may not offer as much insurance protection as regular premium plans and may have less riders/supplementary benefits available.

You may stop paying the premiums and still enjoy protection as long as there is a sufficient total investment value to pay for the insurance charges, policy fee and supplementary benefit premiums, where applicable. However, there is a possibility of the policy lapsing when the required charges, including rider charges, exceed the value of the fund units available. Purchasing too many unit-deduction riders may deplete the fund units.

Buying an investment-linked insurance plan is a long-term commitment. An early termination of the policy involves high costs and the withdrawal value is dependent on prevailing market value of the underlying assets of the unit fund. Therefore, the withdrawal value may be less than the total premiums paid. The policy value may rise or fall, based on the underlying performance of the funds. The performance of the funds is not guaranteed. The sustainability of the policy depends on the underlying performance of the funds. The investment risk under the policy will be borne solely by the policy owner. Past actual performance is not a guide to future performance, which may be different.

Any amount of the premium that has not been allocated to purchase units is used to meet the payment of commissions to intermediaries and general expenses of the Company. The Company reserves the right, in circumstances it considers exceptional, to suspend issuance or redemption of units.
