"We have achieved a strong set of results for the first half of the year. The Group's Profit Attributable to Shareholders doubled and Total Weighted New Sales and New Business Embedded Value recorded a significant growth.

The strong performance on Total Weighted New Sales and New Business Embedded Value was the result of our business resilience, achieved through the building of capabilities and competencies in our distribution, product and digital front.

We are committed to sustainability and are pleased to provide our customers with access to green insurance solutions, starting with our recently launched, GREAT Green SP. This is the first green life insurance product in Singapore and it is a short-term endowment policy, which invests its portfolio assets to achieve positive environmental impact. We believe this is a step in the right direction to empower our customers to make a positive difference to the environment with their financial decisions.

Looking ahead, challenges brought forth by the evolving COVID-19 situation are likely to persist. We will continue to strengthen our distribution and product offerings to deliver the right solutions to meet the needs of our customers."
