How Prime Life Rewards 5 works

¹ Death Benefit payable is higher of the following: 101% of total standard annual premiums paid, less total Survival Benefit paid out (if any); or Guaranteed surrender value, plus attaching bonus (if any) and less any indebtedness.

* 3.40% comprises guaranteed income computed at 1.50% of total premium and non-guaranteed cash bonus computed at 1.90% of total premium. Non-guaranteed cash bonus is based on illustrated investment rate of return of 4.75% p.a. As the bonus rates used for the benefits illustrated are not guaranteed, the actual benefits payable will vary according to the future experience of the participating fund. 3.40% is rounded down to the nearest decimal place in the illustration and only applicable for yearly payment mode.

² Refers to total annual premiums paid over the full premium payment term for the policy.

³ Current prevailing rate at 3% p.a, subject to change without prior notice.

[†] The figure comprises of guaranteed and non-guaranteed benefits. The non-guaranteed benefit is illustrated based on assumption that the illustrated investment rate of return of the participating fund is at 4.75% p.a.

At 3.25% p.a. illustrated investment rate of return:

The amount that Mr. Lim collects from the 4th policy anniversary is S\$1,485/ year. At age 75, the amount he has received from the monthly payouts is S\$46,616, and the amount he receives from the lump sum cashout is S\$57,665. Hence, the total amount he receives is S\$104,281. As the bonus rates used for the benefits illustrated are not guaranteed, the actual benefits payable will vary according to the future experience of the participating fund. Policy will terminate after lump sum cash out of full surrender value.
